Grown-ups!

It's time to get Sugar Smart!

Too much sugar is bad for children's health as it can lead to the build-up of harmful fat on the inside that we can't see. This fat can cause weight gain and serious diseases like type 2 diabetes, which people are getting younger than ever before.

Having too much sugar can also cause painful tooth decay, and every ten minutes, a child in England has a tooth removed.

Where's all this sugar coming from?

- Kids are getting most of their sugar from sugary drinks. But sweets, chocolate, cakes, biscuits, puddings, yoghurts and breakfast cereals all contribute too!
- The good news is there's an easy way to cut down - by swapping to lower-sugar versions of our everyday foods and drinks.
- It's easy to find out how much sugar is in your family favourites. Just download the Change4Life Food Scanner app and scan the barcode on your cereal, yoghurts, drinks and puddings. Why not give it a go with the kids and write the number of cubes in the box next to each item?
- And remember, make a swap when you next shop!
